

ADEBAYO JAMIU

Software Engineer | Mobile Application Developer

☎ +234 816 579 8543 | +234 912 372 5428 | ✉ adebayojamiu38@gmail.com | 🔗 [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4+ years of hands-on experience designing, developing, and deploying enterprise-grade applications across mobile, web, and backend platforms. Demonstrated expertise in full-stack development (React, Node.js), mobile application development (Android/Kotlin), biometric authentication systems, and real-time applications. Proven ability to deliver scalable, secure solutions for logistics, oil & gas, identity verification, and e-commerce sectors. Strong advocate for clean code, agile methodologies, and continuous learning. Passionate about leveraging technology to solve complex business challenges and drive digital transformation.

PROFESSIONAL EXPERIENCE

Software Developer

Identiko Integrated Solutions | December 2022 – Present

- Architected and developed a comprehensive biometric authentication system using Kotlin, implementing face recognition, fingerprint scanning, and NFC card-tap functionality to manage employee access control and attendance tracking with 99.7% accuracy.
- Built an end-to-end attendance management dashboard using React that displays real-time clock-in/clock-out logs, generates attendance summaries, calculates total work hours per employee, and provides administrative reporting capabilities for HR operations.
- Designed and deployed a full-stack logistics delivery application for a food delivery company using React and Node.js, integrating multi-party workflows (customers, vendors, delivery riders) with real-time order tracking, automated notifications, and route optimization.
- Developed a card batch collection mobile application in Kotlin that digitizes the capture, validation, and transmission of card details in batches to client servers via secure REST APIs, reducing manual processing time by 65%.
- Created a corporate website for an oil and gas company using Node.js, showcasing company services, portfolio, and operational capabilities with responsive design, SEO optimization, and content management integration.
- Built a movie discovery application leveraging third-party APIs to fetch and display trending movies across multiple genres, implementing advanced search, filtering, categorization, and download functionality for enhanced user experience.
- Developed an e-commerce platform with features including product catalogs, shopping cart, secure checkout, and payment integration using React, delivering a seamless user experience with optimized load times.
- Engineered a real-time chat application using WebSocket technology, supporting private messaging, group chats, user presence indicators, and message persistence with MongoDB backend.
- Created a recipe book application enabling users to browse curated recipes, save favorites, search by ingredients, and auto-generate shopping lists based on selected recipes.
- Actively work with MOSIP (Modular Open-Source Identity Platform) for identity verification solutions, gaining expertise in biometric systems, secure data handling, and government-grade authentication protocols.

Software Development Intern

The Code Academy | August 2021 – November 2022

- Developed a full-featured e-commerce marketplace using the MERN stack (MongoDB, Express.js, React, Node.js) with secure user authentication via Passport.js, enabling users to create, read, update, and delete content across various product categories.
- Built a real estate web application integrating Cloudinary for cloud-based image storage and management, allowing realtors to list properties with high-quality images while enabling clients to search listings and view realtor profiles.
- Designed and maintained a personal portfolio website showcasing software projects, technical skills, and professional achievements with responsive design and interactive elements.

TECHNICAL SKILLS

Programming Languages: JavaScript, Kotlin, Python, SQL

Frontend Development: React.js, HTML5, CSS3, Responsive Design, UI/UX Design Principles

Backend Development: Node.js, Express.js, REST APIs, WebSocket, API Integration

Mobile Development: Android Development (Kotlin), MVVM Architecture, Material Design

Database Technologies: MongoDB, SQL, Firebase, Cloud Firestore

Biometric Systems: Face Recognition, Fingerprint Authentication, RFID/NFC Integration

Identity Platforms: MOSIP (Modular Open-Source Identity Platform)

DevOps & Tools: Git/GitHub, CI/CD Pipelines, Agile/Scrum Methodologies, JIRA

Cloud & Services: Cloudinary, Firebase, Heroku, WebSocket Services

Design & Prototyping: Figma, Wireframing, Prototyping, Adobe XD

Data Analysis: Microsoft Excel, Python (Pandas), Statistical Analysis

KEY PROJECTS & PORTFOLIO

- **Biometric Attendance System (Android/Kotlin + React Dashboard):** Enterprise-grade attendance solution featuring face recognition, fingerprint scanning, and NFC authentication with real-time dashboard for HR reporting and analytics.
- **Food Delivery Logistics Platform (React + Node.js):** Multi-vendor delivery application connecting customers, restaurants, and riders with real-time order management, GPS tracking, and automated dispatch systems.
- **Card Batch Collection App (Android/Kotlin):** Mobile application for digitizing card data collection with batch processing capabilities and secure API transmission to client systems.
- **Corporate Website for Oil & Gas Company (Node.js):** Professional corporate website showcasing company services, portfolio, and industry expertise with CMS integration and SEO optimization.
- **Movie Discovery Application (React + External APIs):** Entertainment app aggregating trending movies from multiple APIs with advanced search, categorization, and download features.
- **Real-Time Chat Application (WebSocket + MongoDB):** Full-featured messaging platform supporting private chats, group conversations, presence indicators, and message history.
- **E-Commerce Platform (MERN Stack):** Complete online marketplace with product management, shopping cart, secure authentication, and payment gateway integration.
- **Real Estate Web Application (React + Node.js + Cloudinary):** Property listing platform enabling realtors to manage listings with cloud-hosted images and clients to search properties by location, price, and features.

EDUCATION

Bachelor of Science in Statistics

University of Ilorin, Ilorin, Nigeria | September 2016 – August 2021

Software Development Bootcamp

The Code Center Bootcamp, Lagos, Nigeria | August 2021 – April 2022

PROFESSIONAL DEVELOPMENT & CONFERENCES

- Art of Lagos 2023 – Technology and Innovation Conference
- Open-Source Festival 2022 – Community-driven Software Development
- OSCA'22 (Open-Source Community Africa) – Collaborative Open-Source Initiatives
- Ongoing DevOps Training – Docker, Kubernetes, CI/CD Best Practices
- MOSIP Certification Training – Identity Verification and Biometric Systems

CERTIFICATIONS & ACHIEVEMENTS

- Successfully deployed 15+ production applications across mobile and web platforms serving thousands of active users
- Active contributor to open-source projects on GitHub with focus on React components and Node.js utilities
- Recognized for implementing biometric systems that improved employee attendance accuracy by 99.7%
- Reduced manual data processing time by 65% through automated card batch collection system
- Consistently delivered projects on time and within budget while maintaining high code quality standards

ADDITIONAL INFORMATION

Languages: English (Fluent), Yoruba (Native)

Professional Interests: Cloud Architecture, DevOps Automation, Machine Learning, Blockchain Technology, Software Architecture
